FOR IMMEDIATE RELEASE

MammoLink® Announces Grand Opening of First-Ever Bradenton Breast Imaging Center

New center brings specialized breast imaging, faster answers and coordinated breast care to the Bradenton community

BRADENTON, Fla. — MammoLink® will celebrate the grand opening of its first-ever physical location, a new breast imaging center in Bradenton, on Saturday, October 17th, 2026, from 8:00 a.m. to 5:00 p.m. The center is located at 1720 Manatee Avenue East, Bradenton, Florida 34208.

The opening marks an important new chapter for MammoLink, bringing its breast-imaging model directly to the community. The new center is designed around convenience, specialization and faster answers, offering 3D screening and diagnostic mammography, breast ultrasound and expert interpretation by fellowship-trained breast radiologists.

The center will also provide closely coordinated care with Dr. Heidi Emrani, a breast surgeon affiliated with HCA Florida Healthcare, helping patients move more efficiently from screening and diagnosis to surgical consultation when needed.

“Women should not have to wait weeks for answers or navigate a fragmented system during one of the most stressful moments of their lives,” said Dr. Ryan Polselli, founder and CEO of MammoLink®. “Our Bradenton center was created to provide expert breast imaging, faster results and a more connected path forward—all in one convenient location.”

As part of the grand-opening celebration, MammoLink will offer complimentary 3D screening mammograms from 8:00 a.m. through 5:00 p.m. Appointments are strongly encouraged because availability is limited. A physician’s order is not required for routine screening mammography.

Community members are invited to visit the center, meet the breast-health team, tour the new facility and learn more about MammoLink’s approach to comprehensive breast care. Dr. Polselli
